A minority-owned micro business (WOSB), Noble Smart provides business technology solutions, cloud hosting, managed services, website design, content management, application development, training, and technical support to help our clients achieve their business and IT goals. With more than 20 years of experience in software development and technology consulting in different industries and federal government, we now support to state and local government agencies.

Noble Smart offers decades of experience and expertise in design, implementation, and delivery of enterprise-level content management system, along with years of experience in delivering custom software solutions and commercial off-the-shelf (COTS) products. We design, develop, and deploy software solutions based on the clients' specific requirements and business needs. We make the solution work for you, we work smart for you.

Our latest offering of smart infrastructure planning and design includes smart campus, hospital, city, port, and airport. We work with major technology providers backed up with decades of expertise.

The cloud is the latest technology where most organizations and businesses trying to get their hands into, either migrate existing applications, reduce their legacy technology infrastructure, build a brand new application on the cloud, build a mobile and hybrid application, or integrate with social media to increase traffic and business. Noble Smart has all the experience and resources needed to help businesses of any size get into the cloud and streamline their technology operations.

Our cloud solution offerings include simple storage solutions, elastic cloud computing, domain management, content delivery network, load balancing, virtual workspace, API building, serverless technology, online source control repository, continuous integration and deployment, native cloud IDE, relational database, data archive/recovery/management, user management, disaster recovery, security analysis, mobile technology, analytics, search engine optimization, logo and graphic design, and many more.

Other services include technology and corporate training and translations.
